Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: applicants claim a process for oxidizing primary and secondary alcohols to aldehydes and ketones by reacting said alcohol(s) with an oxidant, wherein said alcohol is in a solution including a catalyst selected from 2,2,6,6-tetramethylpiperidinyloxy (TEMPO) catalysts and in the presence of a co-catalyst. The closest prior art of record teach similar processes, using TEMPO catalysts; however, in processes wherein the prior art of record teach the use of a co-catalyst, a halide-containing compound is used as co-catalyst, such as potassium bromide (KBr). The closest prior art of record fails to teach or fairly suggest the use of a co-catalyst comprising *oxymetal ions and salts* thereof, as claimed in the present invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
